

SureMDM: Simplifying Device Lifecycle Management

An easy way to manage, monitor, and secure employee or company owned devices throughout the whole device lifecycle while minimizing security threats and addressing maintenance issues.

42Gears' SureMDM is an intuitive and powerful MDM solution for Android, iOS/iPadOS, Windows, Linux, macOS, Wear OS, VR, and IoT platforms. With SureMDM, IT admins can effectively secure, monitor, and manage company-owned and employee-owned devices. IT admins can manage mobile applications, mobile devices, and mobile content using SureMDM.

Key Features of SureMDM

- Enroll devices easily.
- Provision devices, push apps, and allow employees to access a secure and exclusive Enterprise App Store.
- Lock devices down to several work-related apps or a single app to ensure that employees use devices as intended.
- Lock down or pre-approve specific websites for safe browsing.
- Remotely push and check security certificates.
- Manage multiple active devices and deliver remote troubleshooting assistance.
- Remotely wipe lost devices.
